

MOM, DAD WE NEED YOUR HELP TO PURCHASE A SHADE!!

The first grade class is selling gourmet popcorn in order to raise enough funds to purchase a shade for the playground. Please say yes and contribute to providing a safe environment for all of us. We realize that the shade is costly and will be paid off over time.

Benefits of Hip Roof Shades

We want to get out and actively play, invent new games and interact with other children. One great way to provide us with a safe place to play whenever we want is to install backyard playground equipment. Safety is something to consider no matter what activity we are participating in. You may think you have thought of everything that needs to be done, but did you remember to consider the harmful UV rays you are allowing us to be exposed to? The benefits of installing shade structures for our playground goes beyond keeping the sun off us as we play.

While it is important to do everything in your power to prevent us from becoming overly exposed to the harsh sun, this is not the only reason to include shade structures with our playset. While the sun is at its hottest, especially during the peak summer months, things really start to heat up. Any metal parts on your equipment can literally burn us when they become overheated. Chains on swings and metal attachments to climbing structures become hazards while the sun is beating on them. If our playground is properly shaded, no such overheating of attachments will occur. We often have to cut an afternoon of fun short simply because it gets too hot. The combination of fun active games and the overhead sun can be much too much for us. With shade structures, the fun can continue because, not only will the equipment not become overheated, we will not either. Trees are usually not enough to provide shade over the playground at all times of the day and certainly not all times of the year.

Even during the spring and fall, the sun can get very warm, but the leaves on surrounding trees are not full and capable to provide adequate shade. A little exposure to the sun is not harmful, and in fact is important in keeping proper health. Hours of exposure to the sun during the harshest times of the day is not recommended. Overheating equipment is an issue, especially if it is metal. Moms, dads, grandparents, we need your help. SHS First graders.

Order Form Summary Sheet

Please fill out completely and return this section to your coordinator with your payment. Please transfer your TOTALS from the order form to each column below.

	SNACK BAG	SIGNATURE JAR	VALUE BAG
	Quantity / Total \$	Quantity / Total \$	Quantity / Total \$
LITTLE KETTLE THAT COULD	\$8 x ____ = \$ ____	\$16 x ____ = \$ ____	\$24 x ____ = \$ ____
IN A CARAMEL NUTSHELL	\$12 x ____ = \$ ____	\$24 x ____ = \$ ____	\$36 x ____ = \$ ____
